

J8S-UP

UNDERPAD MACHINE

Underpad machines that
streamline your production process.

Produce products that provide unsurpassed protection.

The JOA® J8S-UP Underpad Machine provides versatility for many different product sizes and folding capabilities, to meet your product and production requirements. This platform-based solution incorporates proprietary JOA® technology that can be customized by our engineering team with features and functionality to meet your unique product and production requirements. Our machine scalability, combined with unrivaled speeds, provides value for years to come.

Machine Features and Options

Configured to Your Needs

- Flexible machine processes are custom designed to your specific requirements
- Integrates with customer-specified commercial hardware, including adhesives or ultrasonic bonding processes
- Modular frame design enables easy upgrades and modifications
- Product flexibility—can accommodate multiple lengths and widths and multiple core variations without hardware changes

Custom Product Design

- Fluff or airlaid absorbent cores
- Multiple cross-folding capabilities including bifold or trifold

Quality Control and Reduced Waste

- Proprietary Vision Control System enables customized product inspections at full speed

Superior Production Speeds

- Full servo technology

Operator Safety and Ease of Use

- Ergonomic, operator-friendly Human Machine Interface (HMI)
- Custom sound abatement

Fully Compliant

- Global safety and electrical compliance
- Meets CE/NFPA/OSHA compliance and regulations

Responsive Support to Reduce Downtime

- Remote assistance for real-time service
- Onsite service
- Flexible Operator and Maintenance training at start-up and available throughout the life of the machine

Evaluate Data to Improve Efficiencies

- Customer-specific production data collection
- Data trending and remote support capabilities

Proprietary Components

- JOA® rotor mill
- JOA® formation drum system
- JOA® vacuum process units

WIDE AND LONG

THESE REPRESENT BASE CONFIGURATIONS. WE CAN ENGINEER A MACHINE TO YOUR SPECIFIC REQUIREMENTS.

**Quick size change
and product flexibility.**

JOA provides a wide range of options to meet your exact product requirements. Our underpad machine can run multiple widths and lengths with minimal part changes. Multiple core forming options are available including fluff or airlaid, and the machine can fold products based on your packaging preferences.

**Add enhancements
with minimal downtime.**

With customer-specific production data collection, you can evaluate data to find the most effective ways to improve efficiencies and quality. Every machine is designed to seamlessly handle upgrades as technologies evolve with minimal investment and downtime.

**Training and service
options that meet your
needs wherever you are.**

Our expert technicians accept calls day and night and travel at a moment's notice when needed. Flexible operator and maintenance training options are available at start-up and throughout the life of your machine. To further our dedication to 24/7 worldwide service, online support solutions are also provided to accelerate the troubleshooting process and minimize downtime.

JOA® Machine Platforms. Ingenious technologies. Unrivalled efficiency.

We engineer it. We build it. We test it. We guarantee it.

Our team develops platforms and modifications for a broad range of customers. With engineers dedicated to designing each platform and expertise in a wide range of manufacturing processes, we help you deliver exactly what consumers want—now and in the future.
