RE: COVID-19

Ensuring the health of our employees and the safety of their families remain our priorities at Curt G. Joa, Inc. We continue operations with aggressive precautions in place to separate employees in time and space and minimize virus infection risk, as recommended by the local and global health officials.

In doing so, we are staying focused on supporting the health and hygiene supply to consumers, hospitals and care homes through our customers, who provide the hygiene and medical products that aid the management of patient care and comfort. JOA continues supporting their efforts from our locations in Sheboygan Falls USA and Mayen Germany, and in the field where they manufacture.

Additionally, JOA is responding to shortages in required personal protective equipment (PPE) by collaborating with customers to expand production capacity for immediate needs and continued supply.

We remain committed to maintaining the health of our employees, supporting our customers and keeping our communities safe.

Sincerely,

A handwritten signature in black ink, appearing to read 'R. J. Michaletz'. The signature is fluid and cursive.

Richard Michaletz
