

A passion for solving today's most complicated production challenges.

Our engineers are dedicated to developing innovative manufacturing solutions. Bring us your ideas and our engineers will make them a reality. We use proven process methodology and state-of-the-art instrumentation to solve the converting industry's toughest product and process challenges. We can evaluate existing machines regardless of the original manufacturer and make recommendations for upgrades and modifications.

Trust experts in numerous technology areas.

For almost 90 years, our engineers have developed hundreds of machines and modifications for a wide variety of disposable products. We have expert mechanical, electrical, and pneumatics engineers dedicated to designing each platform. Consult us for any design changes or modifications—our professionals have unsurpassed expertise in a wide range of technologies and manufacturing processes. Bring us your product idea and we will develop a manufacturing process to meet your production goals.

- Core Forming
- Continuous Web and Discrete Handling
- Unwinds
- Bonding
- Cutting
- Folding
- Automation
- Electrical Controls
- Fluid Flow Analysis
- Vision
- Drive Systems
- Software Programming
- And more

Your partner through every step.

We work with you closely from design through delivery, monitoring the machine from start-up to checkout. Committed to extremely responsive service, you can trust JOA for quality engineering support whenever you need it. We take confidentiality of your project seriously, and we maintain strict procedures to give you peace of mind. All development and validation activities are conducted within the security of enclosed, restricted and secure areas.

Project management backed by proven methodology.

During the problem-solving phase, the project management team dedicated to your project will analyze the problem, potential solutions, risks, goals, and testing methods to ensure the optimal solution. And with a validation phase that uses Six Sigma methodology, Proof of Principal, and more, we always ensure quality and effectiveness.
