

HURRICANE FOLDER

Reduce material packaging and shipping costs.

The JOA® Hurricane™ Folder utilizes patent-pending technology to align the core and waist seam to create a folded product with a compact square shape. This reduces the overall product length and enables you to reduce both package bag height and shipping box height. That means more bags in boxes and more product on pallets—reducing your shipping expenses on a per-package basis. The uniformly folded product is more visually appealing to customers and the packaging material savings will help lower your carbon footprint.

Get the upgrade kit for seamless integration.

Don't let your existing folding process hinder your production speeds. Our Hurricane Folder is available as an upgrade kit for existing machines, and can be integrated into older machines with minimal downtime.
